

REMARKS

In the Office Action, claims 1-24 were cancelled; new claims 25-43 were added.

In the Office Action, the prior claims were rejected under 35 U.S.C. § 103(a) as being unpatentable over U. S. Patent No. 4,680, 785 (Akiyama et al.) in view of U. S. Patent No. 5,179,373 (John). Applicant respects that the new claims are allowable over the references. With respect to claim 25, that claim recites a radio unit comprising a removable card configured to store a personal access number and configured to store a plurality of telephone numbers and a transceiver configured to transmit the personal access number to a wireless network to facilitate access to the wireless network, the transceiver configured to receive a new access number different than the first access number; and the transceiver configured to transmit the new access number to subsequently access the wireless network. Applicant respectfully submits that none of the prior art and in particular the two cited references disclose this combination of elements.

Applicant: Donald L. Schilling
Application No.: 10/730,229

Reconsideration and entry of this amendment is respectfully requested.

Respectfully submitted,

Donald L. Schilling
